PROFESSIONAL EXPERIENCE

Tsoro Technologies – *Full Stack Developer Intern*   Sep 2022 – May 2023

- Developed an in-house report generation system that streamlined the sales department's reporting process, resulting in a 40% increase in efficiency and reduced manual data entry by 50%.
- Led the development of a comprehensive facilities management system for a real estate company, integrating features such as property listings, maintenance tracking, and tenant communications, improving operational management and user satisfaction.
- Worked closely with the marketing team to align web content with promotional strategies, ensuring cohesive and effective digital marketing campaigns.
- Designed and implemented product catalogues and promotional flyers for the company website, contributing to a 25% increase in web traffic and enhancing the overall user engagement and experience.

HIT Technology Transfer, Licensing and Commercialization Centre
– Software Engineer Intern   May 2022 – Aug 2022

- Collaborated with a partner to develop and launch the company's website, increasing web traffic by 50% within three months.
- Led the requirements gathering process for an in-house school management system, conducting over 15 stakeholder interviews to capture detailed project requirements and objectives.
- Developed a comprehensive school website, enabling the easy management of blogs, images, and announcements, which improved engagement by 40% among staff, students, and parents.
- Provided end-user training and created detailed documentation, reducing the time required for the school website's ongoing management by 30%.
